Subject Index of Volume 37

Activity
  nonstoichiometry–activity relationship in perovskite-like manganites, 76
Ageing
  anisotropy in the microstructure and mechanical properties of P/M 7091 aluminium alloy, 349
Al deposition
  electrodeposition of aluminum in molten $AlCl_3$-n-butylpyridinium chloride electrolyte at room temperature, 355
Alumina
  studies of physicochemical and surface properties of alumina modified with rare-earth oxides. I. Preparation, structure and thermal stability, 29
Aluminium
  bulk and surface properties of aluminum: a molecular-dynamics simulation, 382
Aluminium alloys
  anisotropy in the microstructure and mechanical properties of P/M 7091 aluminium alloy, 349
Amorphous calcium phosphates
  hydroxyl apatite coating via amorphous calcium phosphate, 39
Anisotropy
  anisotropy in the microstructure and mechanical properties of P/M 7091 aluminium alloy, 349
Arsenic
  ion implantation and *in situ* doping of silicon, 289

Barium ferrite
  hexaferrite particles prepared by a novel flux method with δ-FeOOH as a precursor, 45
Barium titanate
  growth of large single crystals of $Ba_{1-x}Ca_xTiO_3$ and their characterisation, 82
Bismuth
  microscopy observations of Cz-grown BSO ($Bi_{12}SiO_{20}$) crystals, 90
Block copolymers
  morphology and properties of nylon 6-polyoxypropylene-nylon 6 block copolymers, 161
Borotellurite glass
  optical absorption, infrared and differential thermal analysis studies of borotellurite glass containing nickel, 329

Cadmium fluoride
  preparation and crystal studies of new modifications of PbF_2, 396
Cadmium telluride
  computer simulation of CdTe electrodeposition, 149
Calcium chloride
  calcium chloride modification of lyomesophase structure, 97
Carbonitriding
  study of carbonitriding from diatomaceous earth, 344
CdTe films
  evolution of the morphology, structure and composition of CdTe films potentiostatically electrodeposited from an ethylene glycol-based bath, 141
CeO_2–Dy_2O_3 system
  electrical conductivity of the solid solutions $xCeO_2 + (1-x)Dy_2O_3$; $0.01 \leqslant x \leqslant 0.10$, 17
Ceramic composites
  the mechanical properties of Al_2O_3-Cr_3C_2 composites after high temperature annealing in air, 362
Ceria
  thermal shock resistance of materials based on CeO_2-stabilized tetragonal zirconia polycrystals, 136
Cesium chloride
  thermoluminescence studies on CsCl:NO_3^- crystals irradiated with X-rays, 299
Cesium halides
  thermoluminescence studies on CsCl:Ni crystals, 94
Chalcogenides
  electrosynthesis of SmTe films, 333
Chemical stability
  chemical stability of some manganese glass ceramics, 338
Coating
  hydroxyl apatite coating via amorphous calcium phosphate, 39
Composite oxides
  preparation of nanocrystalline $LaFeO_3$ using reverse drop coprecipitation with polyvinyl alcohol as protecting agent, 132
Computer simulation
  computer simulation of CdTe electrodeposition, 149
Conduction
  quantitative analysis of the electrical properties of tellurite glasses, 376
Conductivity
  electrical properties of electron-beam-evaporated Zn_3P_2–Cd_3P_2 alloy films, 225
Copper
  the effect of metal-doped copper ferrite activity on the catalytic decomposition of hydrogen peroxide, 129
Coprecipitation
  a model for the preparation of coprecipitated $LaBa_2Cu_3O_y$ oxalates, 284
Corrosion
  effect of the PECVD-a-SiC top coating on the passivation resistance of titanium-nitride-coated steel in 3.5% NaCl solution, 170
Crystal phases
  surface characterization of yttria-stabilized tetragonal ZrO_2. Part 1. Structural, morphological, and surface hydration features, 243
Crystal structure
  preparation and crystal studies of new modifications of PbF_2, 396
CVD-diamond submount
  advanced metallization schemes for bonding of InP-based laser devices to CVD-diamond heatsinks, 303

DC reactive sputtering
  effects of excess zinc on the structure of reactively sputtered zinc oxide films, 156

Decomposition
the effect of metal-doped copper ferrite activity on the catalytic decomposition of hydrogen peroxide, 129
Defect structure
electrical conductivity of the solid solutions $xCeO_2+(1-x)Dy_2O_3$; $0.01 \leqslant x \leqslant 0.10$, 17
Delta-FeOOH precursor
hexaferrite particles prepared by a novel flux method with δ-FeOOH as a precursor, 45
Dental porcelain
preparation of nepheline glass-ceramics and their application as dental porcelain, 370
Diatomaceous earth
study of carbonitriding from diatomaceous earth, 344
Diffusion
time stability of Fe films epitaxially grown on a GaAs substrate, 175
Doping
ion implantation and *in situ* doping of silicon, 289

Electrical conductivity
electrical conductivity of the solid solutions $xCeO_2+(1-x)Dy_2O_3$; $0.01 \leqslant x \leqslant 0.10$, 17
Electrochemical corrosion
applications of electrochemical hysteresis for constructing the experimental potential-pH diagram for steels in seawater, 230
Electrodeposition
evolution of the morphology, structure and composition of CdTe films potentiostatically electrodeposited from an ethylene glycol-based bath, 141
computer simulation of CdTe electrodeposition, 149
electrosynthesis of SmTe films, 333
electrodeposition of aluminum in molten $AlCl_3$-n-butylpyridinium chloride electrolyte at room temperature, 355
Electrodes
thermoanalytical investigation of the formation of RuO_2-based mixed-oxide electrodes, 23
Excess zinc
effects of excess zinc on the structure of reactively sputtered zinc oxide films, 156

Ferrite
the effect of metal-doped copper ferrite activity on the catalytic decomposition of hydrogen peroxide, 129
Ferromagnetism
itinerant ferromagnetism in Mn_4N, 52
Flux method
hexaferrite particles prepared by a novel flux method with δ-FeOOH as a precursor, 45

Galena
surface free energy of some lead compounds compared to galena, 64
Gallium arsenide
time stability of Fe films epitaxially grown on a GaAs substrate, 175
Glass ceramics
chemical stability of some manganese glass ceramics, 338
preparation of nepheline glass-ceramics and their application as dental porcelain, 370
Glasses
ultrasonic attenuation of tellurite glasses, 197
quantitative analysis of the electrical properties of tellurite glasses, 376
Grain boundary ensembles
grain boundary ensembles in materials with f.c.c., b.c.c. and diamond structures, 201

Hematite particles
electrokinetic studies of monodisperse hematite particles: effects of inorganic electrolytes and amino acids, 68
HgCdTe films
kinetic study of the ISOVPE process of HgCdTe films, 258
Hydrogen peroxide
the effect of metal-doped copper ferrite activity on the catalytic decomposition of hydrogen peroxide, 129
Hydroxyapatite coatings
characterization of plasma-sprayed bioactive hydroxyapatite coatings *in vitro* and *in vivo*, 55
Hydroxyl apatite
hydroxyl apatite coating via amorphous calcium phosphate, 39

Inverse microemulsions
preparation of fine $LaNiO_3$ powder from oxalate precursors via reactions in inverse microemulsions, 263
Ionic conductors
^{31}P and ^{29}Si solid nuclear magnetic resonance studies on the $Na_3Zr_{2-x}Y_xSi_{2-x}P_{1+x}O_{12}$ system, 86
Ion implantation
Ion implantation and *in situ* doping of silicon, 289
Iron
hexaferrite particles prepared by a novel flux method with δ-FeOOH as a precursor, 45
time stability of Fe films epitaxially grown on a GaAs substrate, 175

Kinetics
kinetic study of the ISOVPE process of HgCdTe films, 258
kinetic analysis in laser pyrolysis of $Si(CH_3)_2Cl_2$, 269

Lanthanum
preparation of nanocrystalline $LaFeO_3$ using reverse drop coprecipitation with polyvinyl alcohol as protecting agent, 132
preparation of fine $LaNiO_3$ powder from oxalate precursors via reactions in inverse microemulsions, 263
Lanthanum–barium–copper
morphology and thermal decomposition behavior of coprecipitated La–Ba–Cu oxalate, 278
Laser diode bonding
advanced metallization schemes for bonding of InP-based laser devices to CVD-diamond heatsinks, 303
Laser pyrolysis
kinetic analysis in laser pyrolysis of $Si(CH_3)_2Cl_2$, 269
Lead compounds
surface free energy of some lead compounds compared to galena, 64
Lead fluoride
preparation and crystal studies of new modifications of PbF_2, 396
Luminescence
luminescence in one-dimensional chains of closed-shell transition-metal oxocomplexes, 389
Lyomesophase structure
calcium chloride modification of lyomesophase structure, 97

Manganese
chemical stability of some manganese glass ceramics, 338

Manganites
nonstoichiometry–activity relationship in perovskite-like manganites, 76
Martensitic transformation
the martensitic transformation in Ti-rich TiNi shape memory alloys, 184
Mechanical properties
morphology and properties of nylon 6-polyoxypropylene-nylon 6 block copolymers, 161
the mechanical properties of Al_2O_3-Cr_3C_2 composites after high temperature annealing in air, 362
Metallic bonding
advanced metallization schemes for bonding of InP-based laser devices to CVD-diamond heatsinks, 303
Microcracks
hydroxyl apatite coating via amorphous calcium phosphate, 39
Microscopy
microscopy observations of Cz-grown BSO ($Bi_{12}SiO_{20}$) crystals, 90
Microstructures
the mechanical properties of Al_2O_3-Cr_3C_2 composites after high temperature annealing in air, 362
Mobility
electrical properties of electron-beam-evaporated Zn_3P_2–Cd_3P_2 alloy films, 225
Molecular dynamics
bulk and surface properties of aluminum: a molecular-dynamics simulation, 382
Molybdenum
ultrasonic attenuation of tellurite glasses, 197
elastic constants of semiconducting tellurite glasses, 295
Morphology
morphology and properties of nylon 6-polyoxypropylene-nylon 6 block copolymers, 161
surface characterization of yttria-stabilized tetragonal ZrO_2. Part 1. Structural, morphological, and surface hydration features, 243

Nanocrystals
preparation of nanocrystalline $LaFeO_3$ using reverse drop coprecipitation with polyvinyl alcohol as protecting agent, 132
NASICON
^{31}P and ^{29}Si solid nuclear magnetic resonance studies on the $Na_3Zr_{2-x}Y_xSi_{2-x}P_{1+x}O_{12}$ system, 86
Nepheline
preparation of nepheline glass-ceramics and their application as dental porcelain, 370
New bone healing index
characterization of plasma-sprayed bioactive hydroxyapatite coatings *in vitro* and *in vivo*, 55
Ni^{2+}
thermoluminescence studies on CsCl:Ni crystals, 94
Nickel
preparation of fine $LaNiO_3$ powder from oxalate precursors via reactions in inverse microemulsions, 263
optical absorption, infrared and differential thermal analysis studies of borotellurite glass containing nickel, 329
Ni–Cr alloy patterns
preparation of nepheline glass-ceramics and their application as dental porcelain, 370
Nonstoichiometry
nonstoichiometry–activity relationship in perovskite-like manganites, 76
Nuclear magnetic resonance
^{31}P and ^{29}Si solid nuclear magnetic resonance studies on the $Na_3Zr_{2-x}Y_xSi_{2-x}P_{1+x}O_{12}$ system, 86
Nucleation
nucleation in the pre-coalescence stages: universal kinetic laws, 1
Nylon 6
morphology and properties of nylon 6-polyoxypropylene-nylon 6 block copolymers, 161

Optical absorption
thermoluminescence studies on CsCl:Ni crystals, 94
Osteoconductivity
characterization of plasma-sprayed bioactive hydroxyapatite coatings *in vitro* and *in vivo*, 55
Oxalates
preparation of fine $LaNiO_3$ powder from oxalate precursors via reactions in inverse microemulsions, 263
morphology and thermal decomposition behavior of coprecipitated La–Ba–Cu oxalate, 278
a model for the preparation of coprecipitated $LaBa_2Cu_3O_y$ oxalates, 284
Oxidation
the mechanical properties of Al_2O_3-Cr_3C_2 composites after high temperature annealing in air, 362
Oxide crystals
microscopy observations of Cz-grown BSO ($Bi_{12}SiO_{20}$) crystals, 90
Oxides
thermoanalytical investigation of the formation of RuO_2-based mixed-oxide electrodes, 23
Oxocomplexes
luminescence in one-dimensional chains of closed-shell transition-metal oxocomplexes, 389

Palladium
solidification of silver–palladium single crystals, 237
Particulate recording media
hexaferrite particles prepared by a novel flux method with δ-FeOOH as a precursor, 45
Passivation resistance
effect of the PECVD-a-SiC top coating on the passivation resistance of titanium-nitride-coated steel in 3.5% NaCl solution, 170
Phosphorus
ion implantation and *in situ* doping of silicon, 289
Photoresponse
electrical properties of electron-beam-evaporated Zn_3P_2–Cd_3P_2 alloy films, 225
Physicochemical properties
studies of physicochemical and surface properties of alumina modified with rare-earth oxides. I. Preparation, structure and thermal stability, 29
Plasma spray
hydroxyl apatite coating via amorphous calcium phosphate, 39
Polycrystals
thermal shock resistance of materials based on CeO_2-stabilized tetragonal zirconia polycrystals, 136
Polymers
stress relaxation in poly(styrene-butadiene-styrene) and poly(styrene-isoprene-styrene) triblock copolymers and their derivatives, 191
Polyoxypropylene
morphology and properties of nylon 6-polyoxypropylene-nylon 6 block copolymers, 161

Preparation
preparation of nanocrystalline $LaFeO_3$ using reverse drop coprecipitation with polyvinyl alcohol as protecting agent, 132
Pyroelectric
growth and characterization of triglycine sulpho-phosphate mixed crystals, 180

Rare-earth oxides
studies of physicochemical and surface properties of alumina modified with rare-earth oxides. I. Preparation, structure and thermal stability, 29
Room temperature melts
electrodeposition of aluminum in molten $AlCl_3$-n-butylpyridinium chloride electrolyte at room temperature, 355
Ruthenium
thermoanalytical investigation of the formation of RuO_2-based mixed-oxide electrodes, 23

Samarium
electrosynthesis of SmTe films, 333
Seawater
applications of electrochemical hysteresis for constructing the experimental potential-pH diagram for steels in seawater, 230
Semiconductors
semiconductor wafer bonding: recent developments, 101
evolution of the morphology, structure and composition of CdTe films potentiostatically electrodeposited from an ethylene glycol-based bath, 141
ion implantation and *in situ* doping of silicon, 289
elastic constants of semiconducting tellurite glasses, 295
Shape recovery
the martensitic transformation in Ti-rich TiNi shape memory alloys, 184
SiC
effect of the PECVD-a-SiC top coating on the passivation resistance of titanium-nitride-coated steel in 3.5% NaCl solution, 170
Silanes
kinetic analysis in laser pyrolysis of $Si(CH_3)_2Cl_2$, 269
Silicon
semiconductor wafer bonding: recent developments, 101
Silver
solidification of silver–palladium single crystals, 237
Single crystals
microscopy observations of Cz-grown BSO ($Bi_{12}SiO_{20}$) crystals, 90
solidification of silver–palladium single crystals, 237
Solder
advanced metallization schemes for bonding of InP-based laser devices to CVD-diamond heatsinks, 303
Solidification
solidification of silver–palladium single crystals, 237
Stability
time stability of Fe films epitaxially grown on a GaAs substrate, 175
Steel
effect of the PECVD-a-SiC top coating on the passivation resistance of titanium-nitride-coated steel in 3.5% NaCl solution, 170
applications of electrochemical hysteresis for constructing the experimental potential-pH diagram for steels in seawater, 230
Stress relaxation
stress relaxation in poly(styrene-butadiene-styrene) and poly(styrene-isoprene-styrene) triblock copolymers and their derivatives, 191
Strontium ferrite
hexaferrite particles prepared by a novel flux method with δ-FeOOH as a precursor, 45
Styrene
stress relaxation in poly(styrene-butadiene-styrene) and poly(styrene-isoprene-styrene) triblock copolymers and their derivatives, 191
Superconductors
morphology and thermal decomposition behavior of coprecipitated La–Ba–Cu oxalate, 278
a model for the preparation of coprecipitated $LaBa_2Cu_3O_y$ oxalates, 284
Surface free energy
surface free energy of some lead compounds compared to galena, 64
Surface hydroxyls
surface characterization of yttria-stabilized tetragonal ZrO_2. Part 1. Structural, morphological, and surface hydration features, 243
Surface properties
studies of physicochemical and surface properties of alumina modified with rare-earth oxides. I. Preparation, structure and thermal stability, 29

Tellurites
ultrasonic attenuation of tellurite glasses, 197
Tellurium
elastic constants of semiconducting tellurite glasses, 295
electrosynthesis of SmTe films, 333
quantitative analysis of the electrical properties of tellurite glasses, 376
Tetragonal zirconia
surface characterization of yttria-stabilized tetragonal ZrO_2. Part 1. Structural, morphological, and surface hydration features, 243
Thermal shock resistance
thermal shock resistance of materials based on CeO_2-stabilized tetragonal zirconia polycrystals, 136
Thermoanalysis
thermoanalytical investigation of the formation of RuO_2-based mixed-oxide electrodes, 23
Thermoluminescence
thermoluminescence studies on $CsCl:NO_3^-$ crystals irradiated with X-rays, 299
Thin films
evolution of the morphology, structure and composition of CdTe films potentiostatically electrodeposited from an ethylene glycol-based bath, 141
electrosynthesis of SmTe films, 333
Ti-rich TiNi alloys
the martensitic transformation in Ti-rich TiNi shape memory alloys, 184
TL
thermoluminescence studies on CsCl:Ni crystals, 94
TL emission
thermoluminescence studies on CsCl:Ni crystals, 94
Triglycine sulphate
growth and characterization of triglycine sulpho-phosphate mixed crystals, 180
Tungsten
quantitative analysis of the electrical properties of tellurite glasses, 376

Twin morphology
grain boundary ensembles in materials with f.c.c., b.c.c. and diamond structures, 201

Ultrasonic attenuation
ultrasonic attenuation of tellurite glasses, 197

Vapour-phase epitaxy
kinetic study of the ISOVPE process of HgCdTe films, 258

Wafer bonding
semiconductor wafer bonding: recent developments, 101

X-rays
thermoluminescence studies on $CsCl:NO_3^-$ crystals irradiated with X-rays, 299

Yttrium
^{31}P and ^{29}Si solid nuclear magnetic resonance studies on the $Na_3Zr_{2-x}Y_xSi_{2-x}P_{1+x}O_{12}$ system, 86
surface characterization of yttria-stabilized tetragonal ZrO_2. Part 1. Structural, morphological, and surface hydration features, 243

Zirconia
thermal shock resistance of materials based on CeO_2-stabilized tetragonal zirconia polycrystals, 136
Zirconium
^{31}P and ^{29}Si solid nuclear magnetic resonance studies on the $Na_3Zr_{2-x}Y_xSi_{2-x}P_{1+x}O_{12}$ system, 86
ZnO films
effects of excess zinc on the structure of reactively sputtered zinc oxide films, 156
